## Budding Developer

## PERSONAL PROFILE

I am a B.E. undergraduate student interested in programming and eager to learn more about the technical world. I've worked on real-time projects and developed few apps.

## PROJECTS

### Quizinato

- A **Firebase** based responsive **progressive web app** using **React** for multiplayer quiz challenge and practice that keeps track of leaderboard and individual user statistics.

### News-App

- An **Android** app built with **React Native** that retrieves news from Google News **API**. The app has an inbuilt web view and features to search for and share news.

### Askimo

- An interactive chatbot using **javascript** that browses Wikipedia to find answers to your questions.

### Justpay

- A Web app with login and signup capabilities that replicates mobile payments, developed with **Firebase** and **Bootstrap**.

### WeatherMan

- A web app that uses the openweathermap **API** and **javascript** to display and share weather information for any place.
